

Truematter job description

Front-End Web Developer/Production Designer

Overview

A Front-End Web Developer at truematter will be able to understand visual Design concepts and flawlessly convert them to Front-End HTML code. The ideal candidate will possess jaw-dropping knowledge of HTML, XHTML, CSS and JavaScript and will be fully conversant on browser compatibility issues and strategies.

Required Qualities/Skills

A *Front-End Web Developer/Production Designer* must possess the following qualities:

- Code Skills - Thorough knowledge and experience creating excellent front-end code (HTML, XHTML, CSS, JavaScript, etc.)
- Design Skills – Photoshop proficiency, production-level visual design experience.
- Strong affinity for the Internet and the digital lifestyle.
- Relentless desire to learn and leverage the latest Web technologies.
- *Detail-oriented and highly organized.*
- Creative problem-solving skills, an investigative mentality, and a love of logical thinking.
- Be committed to delivering solutions on time and within budget.
- Ability to multi-task and meet tight deadlines.

Desired Qualities/Skills

The ideal candidate will also possess the following skills/qualities:

- Visual Design Experience and skill – Ability to extrapolate established visual design templates into a series of internal screens. Ability to create original design is not required, but would be considered valuable.

- Flash – Ability to implement simple Flash solutions via scripting.
- Advanced Scripting – We're interested in folks with ability to handle technologies such as AJAX, PHP, ASP.NET.

Responsibilities

Help create high-end, effective Web sites and Web applications.

Participate in requirements gathering sessions with development team. Code Front-End solutions using site maps, wireframes, requirements documentation and visual design templates. Use design skills to create production graphics and extrapolate original visual design.

Communicate externally and internally

Work with internal team to resolve any issues encountered during project development. Present final solution to client. Work closely with client in support after final project delivery.

Education

BA or higher is expected but not required if work experience and code samples are strong.

Experience

At least 2 years experience as a Front-End Web Developer. If you lack this, you will have to WOW us with your innate understanding of the medium, outstanding skills, and ability to grasp and execute the position's requirements.

Evaluation Criteria

Applicants will be evaluated based on experience, **online portfolio**, interview and references.
